## Supply Chain Risk Management –ISCRIM Researchers at the Forefront of International Research

Following the previous successful publication, 'Supply Chain Risk', edited by Dr. Clare Brindley and published by Ashgate in 2004, the ISCRIM team has again been invited to publish a text in the field of Supply Chain Risk Management. Professor Bob Ritchie together with Associate Professor George Zsidisin from Michigan State University will edit the latest text. The book is being published within the Springer International Series in Operations Research and Management Science. The series' editor is Frederick Hillier from Stanford University. He has suggested that the book is worthy of the status of a handbook since it defines the state-of-the-art in what is considered to be a very important and emergent field in the Operations Research and Management Science area. The title of the text is "*SUPPLY CHAIN RISK: A Handbook of Assessment, Management and Performance*".

A distinctive feature of the text is that the 35 contributors are drawn from 12 different countries and each is operating at the leading edge in this new field in terms of research, consultancy and practice.

The book is designed to cover the emergent field of Supply Chain Management with the specific orientation towards Risk Management. The six sections addressed in the text are: Risk Analysis, Assessment and Tools; Risk Theory; Supply Chain Design and Risk; Supply Chain Risk Management; Risk and Performance Measurement in Supply Chains; and Supply Chain Security. The chapters will report on both quantitative and qualitative studies with an emphasis on the relevance, understanding and application by those in the research community as well as the knowledgeable practitioner and policy maker. The book is scheduled to be published later in 2007.

## Ongoing book projects

**Zsidisin, George & Ritchie, Bob (eds):** *Supply Chain Risk: Assessment, management, and performance*. Springer International. Expected publication: late 2007.

Professor **Simon Burtonshaw-Gunn** has received a contract from publishers John Wiley and Sons for a student, management and management consultant level text book: "*The Essential Management Toolbox*" with a publication date planned for October 2007. Naturally the book covers a wide range of management topics including two close the heart of the ISCRIM group: Risk Management and Supply Chain Management. The purpose of the book is to provide readers with models, tools and briefing notes with a clear indication of where they should look for more detailed knowledge on each topic.

## Panel Discussion on Supply Continuity

**Steven Melnyk** and **George Zsidisin** will be hosting an invited panel discussion on supply chain disruptions for the upcoming Decision Sciences Institute Annual Meeting, which will be held in Phoenix, Arizona from November 17-20, 2007. So far, Jennifer Blackhurst, Iowa State University and ISCRiM member, Christopher Craighead, Auburn University, and Alex Rodrigues, Michigan State University, will be participating.

All ISCRiM members are invited to participate in this invited panel discussion. If you are interested in participating, please contact George Zsidisin, [zsidisin@msu.edu](mailto:zsidisin@msu.edu), or Steven Melnyk, [melnyk@msu.edu](mailto:melnyk@msu.edu).
